# DEPARTMENT I.

## MINING AND METALLURGY.

### MINERALS, ORES, BUILDING STONES, AND MINING PRODUCTS.

#### CLASS 100.

Minerals, ores, etc. Collections of minerals systematically arranged; geological collections, etc.

#### PROVINCE OF MENDOZA.

HIPOLITO RAYMOND.

*A collection of minerals, as follows:*

- 1 Ore from Cacheuta. This is chiefly a selenide of lead, from a lode which crosses the principal vein containing selenide of silver, together with copper and cobalt.
- 2 Ore from an outcrop of the principal vein, at the north of the workings, Paramillo de Cacheuta.
- 3 Cupriferous quartz rock, from outcrop of a vein running east and west.
- 4 Walls of the lode of selenide, with some adhering lead ore.
- 5 Ore from the principal vein, at the north of the workings—quartz.
- 6-9 Bituminous schist, containing vegetable fossils of the tertiary period.
- 10 Lignite, from between the strata of bituminous schists.
- 11 Marls, stratified in the same direction as the schists.
- 12 Coprolite, found on the schists.
- 13 Conglomerate, found among the strata of schists.
- 14 Fibrous sulphate, found among the outcropping schists.
- 15 Galena, from the Rincon de los Mineros.
- 16 Ore from outcrop of the principal selenide vein.
- 17 Ore from Cacheuta: the vein outcrops on the hills where the mines are situated, and is similar to the selenide ore formerly worked on the southern slopes.
- 18 Ore from an outcrop of the ferruginous lode.
- 19 Ore from an outcrop in a ravine leading to the mouth of the Mendoza River.
- 20 Ore from the Salamanca mine, sulphides of copper and iron.
- 21 Rich copper ore, from the same vein at a higher point.

NOTE.—The Salamanca mine is situated 2602 metres above the sea level. Its chief lode is 3 metres wide, directions north and south. At the surface it contains chiefly quartz; lower down appears sulphide of copper, which at a depth of 30 metres degenerates into a poorer yellow pyrites.

- 22 Gypsum, from the Cerro Bayo, four leagues southwest from Mendoza.
- 23 Ore from an outcropping vein on the rising ground of Guevara. A mine of native copper was at one time wrought at this place; close to the vein there exists a valuable deposit of peat.
- 24 Precipitated matters or deposits from the waters of Puente del Inca, in the great Cordillera on the road to Chili, between the Aconcagua and Tupungato. These mineral waters are warm alkaline springs; on issuing they have a temperature of 75° centigrade, and on cooling leave a ferruginous calcarcan deposit. The plants which grow in the small stream supplied by these springs are rich in iodine. The bridge called Puente del Inca has been formed by the deposit from the spring; the river Mendoza passes underneath.
- 25 White clay, from Cerro Bayo.
- 26 Red clay, great deposit among the boulder hills to the south of Mendoza.
- 27 Chromiferous sand, large deposit to the eastward of Uspallata, believed by the exhibitor to be volcanic ashes. It is found in strata among the ridges of Paramillo.
- 28 Ore from Paramillo de Uspallata, clay containing blendeiferous pyrites, part of the Vallejo lode towards the east.
- 29 Ore from the manganiferous lode on the Chili road.
- 30 Crystallized galena, from the San Pedro mine: this is a rare form in the Paramillo district.
- 31 Argentiferous galena, with pyrites and quartz; also a sample of the walls of the lode.
- 32 Galena in a vein of heavy spar, from the Rosario mine.
- 33, 34 The same, from the same.
- 35 Ore from outcrop of the Vallejos lode to the east of the mine.
- 36 Another sample of same ore.
- 37 Colored ores from the San Lorenzo mine.
- 38 Ore from outcrop of the Vallejos lode, to the north of the mine.
- 39 Copper ore, from the South California mine: on the surface this lode consists of quartz with carbonate of copper; at some depth it yields sulphides carrying gold.
- 40 Ore from the San Pedro mine, fibrous carbonate of copper; regarded by the miners as an indication of very rich ores in its immediate vicinity.

## Minerals, Ores, etc.

- 41 Petrified tree, from the superficial metamorphic strata. These strata are very similar to eruptive rocks, and are found in various parts of the Paramillo, close by the bituminous schists. Petrifications of this form are very common; most of them are silicified, but some are of carbonate of lime. Carbonate of iron and blende are also found. The latter disintegrates with great facility.
  - 42 Common concretions from the strata which inclose the petrified trees.
  - 43 Concretions formed by the waters of the Estrechura Spring, Paramillo de Villa Vicencio.
  - 44 Sulphurous deposit which is found between the slags and the metal in the ancient smelting furnaces.
  - 45 Slag, from ancient smelting furnace. There are many remains of Spanish furnaces. Near the smaller lode there is a reverberatory furnace with double fire space. The refuse surrounding these old furnaces contains an appreciable ley of silver.
  - 46 Sulphates of various kinds, in the mica schists, near the Santa Elena mine.
  - 47 Great iron lode, Vallejos mine.
  - 48 Ore from outcrop of vein, Sepultura or Carranza mine.
  - 49 Gypsum, from Challao, lying over the bituminous schists.
  - 50 Stratifications which surround the petrified trees of Paramillo.
  - 51 Asbestos, from between the strata of the bituminous schists of the Paramillo.
  - 52 Vein of quartz and gypsum crystallized, to the south of the Santa Elena mine.
  - 53 Crystal from an eruptive rock from the place called Polvadera.
  - 54 Ore from the surface lode of Cacheuta, at the Rincon de los Mineros.
  - 55 Sulphate of soda. In the Department of the town of La Paz this sulphate is found, nearly pure, in inexhaustible quantities. Notwithstanding its numerous applications for industrial purposes, no use has yet been made of this deposit.
  - 56 Asphalt, from Cacheuta.
  - 57 Ore from a ferruginous vein near the mouth of the river Mendoza.
  - 58 Rock, apparently a volcanic ash; it gives rise to numerous springs.
  - 59 Sample of an eruptive rock from the Paramillo, vulgarly regarded as a copper ore; it is, however, in the opinion of the exhibitor, simply chlorite.
  - 60 Bituminous schist from Challao, distant two leagues from the city.
  - 61 Concretion from the schists.
  - 62 Concretion from the schists.
  - 63 Manganese and carbonate of iron, in veins which traverse the schists at different points.
- NOTE.—Besides the strata of bituminous shales which are found in the western part of the Paramillo, similar deposits occur on the eastern side. Among the hills are mounds of at least 20 metres in height, entirely composed of shales of this class.
- 64 Bituminous schists of the Paramillo. These are more readily split into thin leaves than those of the South and East. Some contain pyrites in such abundance that they could be economically employed in the alum manufacture.
  - 65 Mineral resin, or asphalt, found in thin layers between the schists.
  - 66 Marl, in strata accompanying the schists.
  - 67 Schists with fish-scales on the surface, from the eastern part of the Paramillo.

## THE PROVINCIAL COMMISSION.

*Another collection of minerals, as follows :*

- 68 Silver ore, chloride in iron ochre, Estancia de Platas.
- 69 Ferruginous silver ore, same district.
- 70 Aluminous silver ore, same district.
- 71 Carbonate of copper, same district.
- 72 Ochreous iron ore, same district.
- 73 Yellow copper ore, Department of Tupungato.
- 74 Ochreous gold ore, Department of Tupungato.
- 75 Argentiferous galena, Cerro de Cacheuta.
- 76 Petroleum, from springs in same district.
- 77 Coal, from Cerro de Cacheuta.
- 78 Ochreous gold ore, mouth of river Mendoza.
- 79 Argentiferous galena, Crucecita.
- 80 Ochre, Crucecita.
- 81 Clay iron-stone, Crucecita.
- 82 Copperas, or sulphate of iron, Crucecita.
- 83 Argentiferous galena, Estancia de San Isidro.
- 84 Coal.
- 85 Coal, from Paramillo de Uspallata.
- 86 Silver ore, mixture of chloride and galena, from the San Lorenzo mine, property of Don E. Villanueva, Paramillo de Uspallata.
- 87 Silver ore, with sulphuret of antimony, from the San Pedro mine, same district.
- 88 Silver ore, antimonial galena, from small vein belonging to Don Federico Maza, same district.
- 89 Silver ore, galena, from the Rosario mine, property of Don E. Villanueva, same district.
- 90 Argentiferous galena, from the Rosarito mine, same owner.
- 91 Argentiferous galena, from the Carranza mine, same owner.
- 92 Antimonide of silver, from the Santa Rita mine, property of Don F. Maza, same district.
- 93 Carbonate and sulphide of copper, from the locality known as Manto de Cobre, same owner.
- 94 Carbonate and sulphide of copper, from the Santa Elena mine, Bonilla.
- 95 Carbonate of lime, raw and calcined, from the Cerro de la Cal, in the Department of Las Heras.
- 96 Argentiferous galena, from the Cortada mine, property of Don F. Maza, Paramillo de Uspallata.
- 97 Argentiferous blende and galena, from the Cortada mine, same owner and district.
- 98 Argentiferous blende and galena, from the Tajo mine, same district and owner.
- 99 Argentiferous blende and galena, from the Santa Maria mine, same district and owner.
- 100 Argentiferous galena in ochre, from the San Francisco mine, same district and owner.
- 101 Galena with horn silver, from the Vallejos mine, property of Don Delfin Correas, same district.
- 102 Sulphide of antimony, containing silver, from the San Romualdo mine, property of Don F. Maza, same district.
- 103 Sulphide of antimony, containing silver, from the Alcaparrosa mine, same owner and district.
- 104 Argentiferous galena, from the Carmen mine, same owner and district.
- 105 Oxide of iron, from the Santa Rita mine, same owner and district.
- 106 Petrified wood and kernel, same owner and district.

## Minerals, Ores, etc.

- 107 Bituminous schist, same owner and district.
- 108 Lignite, same district.
- 109 Manganiferous earth, same district.
- 110 Ochreous gold ore, from the Boquis mine, same owner and district.
- 111 Copper ore containing gold, from the Manto de Cobre, same owner.
- 112 Carbonate of copper, same district and owner.
- 113 Clay iron ore, carrying gold and silver, same owner.
- 114 Carbonate of copper, from Manto de Cobre, same owner.
- 115 Carbonate of copper, and pyrites, from Agua de las Minas, same owner.
- 116 Carbonate of copper, with silver, from the Las Cuevas mine, same owner.
- 117 Chloride of silver, from the Las Taperas mine, same owner.
- 118 Gold-bearing ochry clay, from Aguas de las Minas, same owner.
- 119 Chloride of sodium, from place called Aguarras.
- 120 Carbonate of copper, from the same.
- 121 Carbonate of copper, from the same.
- 122 Carbonate of copper and magnetic iron ore, from the Cerro del Catre, Department of Tumbellos.
- 123 Carbonate of copper, from Angostura.
- 124 Gold ore, oxide of iron, from the Cerro Rico mine, Paramillo de Uspallata.
- 125 Stratified quartz, same district.
- 126 Carbonate of copper, South California mine.
- 127 Coal or lignite, from Challao. According to an analysis by Professor Gallegos, of the National College, the mineral contains as follows in 2 grammes:  

Moisture,	0.009
Volatile matters,	0.680 equal to 34 pr. ct.
Fixed matters,	1.311
	2.000
- 128 Crude potashes, or jume ash.
- 129 Gypsum, from San Isidro.
- 130 Argentiferous galena, from Cerro Tolcito, San Rafael.
- 131 Whetstone, same origin.
- 132 Lithographic stone, same origin.
- 133 White marble, from Cerro del Marmol, San Rafael.
- 134 Copper, smelting product, Tupungato.
- 135 Argentiferous galena, from the Vallejos mine, Paramillo de Uspallata.
- 136 Clay, with pyrites, from San Ignacio.
- 137 Talc, from San Ignacio.
- 138 Heavy spar, or sulphate of baryta, from Paramillo.
- 139 Clay iron ore, from same district.
- 140 Rock crystal, from same district.
- 141 Siliceous mineral, from same district.
- 142 Nitre earth.
- 143 Ochre used as a pigment.
- 144 Common salt, from San Rafael.
- 145 Lithographic stone.
- 146 Limestone.
- 147 Pumice stone, from Tupungato, made into a filter.
- 148 Mineral water, from the Puente del Inca.
- 149 Petroleum, from district called Los Buitres, San Rafael.

## DON ABRAHAM LEMOS.

- 150 Yellow earth, for pigment, from Challao.
- 151 Mahogany earth, for pigment, from Challao.
- 152 Fuller's earth, from Challao. This is unrivaled for wool scouring, and could be sold in Buenos Ayres for 6 reals (Bolivian) per arroba of 25 lbs.

- 153 Calcined lime, from the Cerro de la Cal.
- 154 Red clay, used as pigment.
- 155 Refined salt.

## PROVINCE OF RIOJA.

## WILLIAM A. TRELOAR.

*Collection of ores from the Cerro Fumatina, as follows:*

- 1 Collection of samples of native silver, from the Cerro Negro, Rosario mine, property of the exhibitor.
- NOTE.—The Rosario mine is only about 25 metres deep; the samples are taken from distinct veins and workings, and taken at different depths.
- 2 Semi-bar native silver, same mine and proprietor.
- 3 Red native silver, semi-bar, in matrix of pyrites and blende, same mine and proprietor.
- 4 Acerado colorado, silver ore, same mine and proprietor.
- 5 Acerado negro and native silver, same mine and proprietor.
- 6 Silver ore, a combination of acerado negro and various forms of native silver, same mine and proprietor.
- 7 Rosicler claro, ruby blende, proustite, with sulpho-antimonide of silver, and argentiferous pyrites, same mine and proprietor.
- 8 Sulpho-antimonide of silver, and galena, same mine and owner.
- 9 Native silver, in filigree, black oxysulphides, arsenical pyrites, in quartz, same mine and owner.
- 10 Muja, argentiferous lead carbonate and native silver, same mine and owner.
- 11 Galena, rose-tinted and argentiferous, in quartz and oxide of iron.
- 12 Black oxysulphurets of copper, etc., containing native silver and blende, same mine and owner.
- 13 Black oxysulphurets of copper, etc., containing native silver and blende, same mine and owner.
- 14 Cachi espejado, metalliferous rock, same mine and owner.
- 15 Cachi espejado, with native silver, same mine and owner.
- 16 Gray copper ore and native silver, same mine and owner.
- 17 Reddish oxysulphurets and native silver, same mine and owner.
- 18 Black oxysulphurets, native silver of various forms, sulphuret of silver and spots of blende, same mine and owner.
- 19 Black oxysulphurets, same mine and owner.
- 20 Reddish oxysulphurets with native silver, same mine and owner.
- 21 Black oxysulphurets, native silver, same mine and owner.
- 22 Black and reddish oxysulphurets, native silver and sulphuret of silver, same mine and owner.
- 23 Cachi canuto espejado, silicate of lime.
- 24 Native silver, in grains and filigree.
- 25 Native silver, blende, etc.
- 26 Combination of different forms of native silver, in oxysulphurets.
- 27 Native silver, blende, etc.
- 28 Cachi, metalliferous rock with galena, etc.
- 29 Rich cross vein, with indications of native silver.
- 30 Rich cross vein of silver.
- 31 Gina, or leader of the vein.
- 32 Native silver, granular.

## Minerals, Ores, etc.

- 33 Native silver, granular, sulphuret of silver and pyrites.
  - 34 Native silver, granular, sulphuret of silver, black oxysulphurets, blende, and carbonates.
  - 35 Native silver, with argentiferous pyrites, blende, etc.
  - 36 Sulphuret of silver, red oxysulphurets, native silver.
  - 37 Native silver, sulphuret of silver, oxysulphides, etc.
  - 38 Paco, with native silver, oxysulphides, galena, etc.
- These samples are from the deepest working in the mine.
- 39 Native silver in paco.
  - 40 Oxysulphurets in paco.
  - 41 Native silver in paco.
  - 42 Polvorillo in paco, with oxysulphides.
  - 43 Pyrites in paco, sign of native silver or its proximity.
  - 44 Quemazonas in paco.
  - 45 Barra negra, with native silver.
  - 46 Panizo pintador on the surface.
  - 47 Panizo pintador in the interior.
  - 48 Granitic dikes which traverse the panizos.
  - 49 Plomo ronco, sulphuret of silver, native silver, and galena in quartz, from the Sofia mine, in the Cerro Negro, property of the exhibitor.
- This mine has only been wrought for a month, with four men, on a vein of  $1\frac{1}{2}$  metres wide.
- 50 Argentiferous galena and native silver, property of the exhibitor.
  - 51 Quartz with specks of galena, property of the exhibitor.
  - 52 Paco, a sign of silver or its approximation.
  - 53 Paco, with carbonate of lead and gray silver, from the mine San Pedro, Cerro Negro, property of the exhibitor.
  - 54 Silvery pyrites, cross vein, property of the exhibitor.
  - 55 Reddish oxysulphurets, blende in paco.
  - 56 Paco, showing the panizo.
  - 57 Paco with native silver.
  - 58 Native silver, massive, with granular, from the mine of Santo Domingo, Cerro Negro, property of Messrs. Garcia & Achaval.
- Operations in this mine are at present suspended, and have been so for a long period. It is said to be very rich, and the mineral received a prize at the Córdoba exhibition.
- 59 Native silver, with cachi and paco, property of the exhibitor.
  - 60 Ruby blende, proustite, sulpho-antimonide of silver, pyrites, etc., property of the exhibitor.
  - 61 Native silver in paco, with blende.
  - 62 Plomo negro, from the Jarro vein.
  - 63 Native silver in quartz.
  - 64 Antimonial silver, sulphuret of silver in quartz.
  - 65 Native silver, sulphides of silver in paco, from the San Bartolo mine, property of Messrs. Nuñez & Plaza.
  - 66 Native silver, together with galena and quartz, from the San Andres mine, property of Messrs. Alvarez & Gordillo.
  - 67 Native silver, blende, etc., same proprietors.
  - 68 Native silver in cachi and paco, same proprietors, taken at a depth of thirty yards.
  - 69 Polvorillo, with arsenical gray copper, same proprietors.
  - 70 Oxysulphuret of copper in paco, same proprietors.
  - 71 Native silver and polvorillo in quartz, taken at forty metres from surface, same proprietors.
  - 72 Native silver, oxysulphuret of copper, and sulphuret of silver, with blende, taken at fifty metres from surface, same proprietors.
  - 73 Galena, taken at sixty metres from surface, same proprietors.
  - 74 Polvorillo in paco, with blende, same proprietors.
  - 75 Vein crossed by adit level, poor in lead, taken at ninety metres, same proprietors.
  - 76 Blende, from a new vein on surface, same proprietors.
  - 77 Malachite, from a new vein on surface, same proprietors.
  - 78 Lump, sulphate of copper, same proprietors.
  - 79 Galena, same proprietors.
  - 80 Porous silver ore, same proprietors.
  - 81 Ferruginous ore, from surface, Cerro Negro.
  - 82 Argentiferous galena, with spots of blende, from the Buena Esperanza mine, Caldera, property of Señores Larrahona and Treloar.
  - 83 Galena, native silver and blende, same proprietors.
  - 84 Polvorillo de plata, in yellow ore, same proprietors.
  - 85 Polvorillo colorado, with blende, green, and black.
  - 86 Polvorillo, same proprietors.
  - 87 Chloride of silver, same proprietors.
  - 88 Cross vein, from workings at depth of forty metres.
  - 89 Sarcoche in paco, and polvorillo, same proprietors.
  - 90 Cross vein of silver, same proprietors.
  - 91 Argentiferous dark blende, from the Aragonesa mine, Calera, property of Don Carlos Angel.
  - 92 Native silver, sulphuret of silver, blende.
  - 93 Native silver, blende, etc.
  - 94 Native silver, oxysulphide, blende, and galena in quartz, from the Peregrina mine, Cerro Negro, property of Messrs. Fernandez & Gimenez.
  - 95 Native silver, sulphuret of silver, blende, in gangue of heavy spar.
  - 96 Native silver, black oxysulphide of copper, etc., blende, and quartz.
  - 97 Sulphuret of silver, argentiferous pyrites, etc.
  - 98 Sulphuret of silver, crystallized, ruby blende.
  - 99 Native silver, reddish, massive, and filigree.
  - 100 Native silver, ruby blende, etc.
  - 101 Native silver, sulphuret of silver, and argentiferous pyrites.
  - 102 Antimonial silver.
  - 103 Sulph-antimonide of silver, blende.
  - 104 Oxysulphide of copper and blende.
  - 105 Oxysulphide of copper and native silver.
  - 106 Sulph-antimonide of silver, in quartz.
  - 107 Ruby blende, proustite, native silver, etc.
  - 108 Ruby blende in quartz.
  - 109 Native silver, sulphide of silver, oxysulphide.
  - 110 Crystallized sulphide of silver, native silver, and blende.
  - 111 Native silver, filigreed, blende, etc.
  - 112 Native silver, oxysulphide, baryta, etc.
  - 113 Black oxysulphides and sulphide of silver.
  - 114 Black oxysulphides, red oxysulphides, and native silver.
  - 115 Native silver, sulphuret of silver, in porphyry.

## Minerals, Ores, etc.

- 116 Ferruginous silver ore.
- 117 Polybasite, galena, pyrites in carbonate of lime.
- 118 Polybasite in veniform quartz.
- 119 Granular sulphuret of silver, very rich.
- 120 Ruby blendes.
- 121 Native silver and sulphuret of silver.
- 122 Chloride of silver in quartz, from the Blanca mine, Ampallo, property of Messrs. Cruz, Zalazar & Co. This ore is remarkably abundant.
- 123 Polvorillos de plata.
- 124 Silvery blende (very abundant), from the Francesa mine, property of Messrs. Fernandez & Marquez.
- 125 Soroche with yellow argentiferous ore.
- 126 Polvorillo in porous pyritous quartz, from the Urquiza mine, property of Don Ignacio Moreno.
- 127 Polvorillo, from the same.
- 128 Polvorillo in white quartz.
- 129 Native red silver, in plates found in the intersections of the strata of the Socorro mine, Tigre, property of Don Manuel Fernandez.
- 130 Polvorillo in porous yellow ore, from the Colon mine, property of Don Juan Marquez.
- 131 Soroche with galena, from the Maray mine, Cueva de Perez.
- 132 Auriferous porous quartz, from the Don Diego mine, property of the exhibitor. It is calculated that every 5000 of this ore produce 30 oz. of gold.
- 133 Copper, pyritized and carbonates; auriferous.
- 134 Peroxide of iron, auriferous copper ore.
- 135 Blue and green silicates of copper, gold-bearing quartz.
- 136 Ferruginous sand, carbonate of copper; auriferous.
- 137 Auriferous porous oxide of iron, from the San Guillermo mine, property of the exhibitor.
- 138, 139 Porous ferruginous and auriferous quartz.
- 140-44 Porous gold-bearing quartz.
- 145 Black maizillo.
- 146 White maizillo.
- 147 Native copper and oxide, from the Casa Colorada, Oro.
- 148 Iron ores, from the same.
- 149 Magnetic iron, from the Cerro Negro.
- 150 Yellow copper pyrites, from the Upulungo mine, Cerro de la Mejicana, property of Messrs. Valdes, Larrahona, & Treloar.
- 151 Famatinita ore, containing gold, silver, and copper.
- 152 Blue copper (metal añilado).
- 153 Black oxide of copper crystallized.
- 154 Crystallized quartz.
- 155-168 Copper ores.
- 169 Panizo pintador.
- 170 Copper regulus with gold and silver, from the Progreso smelting works, belonging to the same owners.
- 171 Slag.
- 172 Galena, from the Caldera.
- 173 Galena, from the Cerro Negro.
- 174 Galena, from the Casa Colorada.
- 175 Antimony, from the Mejicana.
- 176 Cobalt, from same place.
- 177-183 Argentiferous and auriferous copper ores, from the San Pedro mine, property of Messrs. Galvan & Espiga.
- 184-85 Metallic copper smelted in the Escaleras works.
- 186 Copper regulus.
- 187-89 Calcined ores.
- 190 Crystallized copper ore, from Vinchina.
- 191 Copper ore.
- 192 Iron pyrites, from a mine in Sañogasta.

- 193 Iron pyrites, from the Cuesta Amarilla.
- 194 Iron ore, from Maray, Cueva de Perez.
- 195 Iron ore, from the Santo Domingo mine, Cerro Negro, property of Messrs. Garcia & Achaval.
- 196 Iron ore, from the Portezuelo de San Andres mine, property of the exhibitor.
- 197 Sulph-antimonide of silver, etc., in quartz and paco, from the Yareta mine, property of Larrahona & Treloar.
- 198 Nickel, from the Trinidad mine, Cerro Negro, belonging to Don Carmen Lozada.
- 199 Cubical iron pyrites, from the Cerro Mejicana.
- 200 Native sulphurs.
- 201 Native copperas, from the San Guillermo mine, property of the exhibitor.
- 202 Sulphate of copper, from the Don Diego mine.
- 203 Copperas, from the Don Diego mine.
- 204-222 Ores from new veins on surface, from the Cerro Negro.

*Various non-metalliferous minerals and samples of the principal rocks which form the Cerro Famatina, as follows:*

- 223 Slate, from Rio Blanco, southeast and northwest of the Cerro Nevado.
- 224 Petrified wood, from the same.
- 225 Variegated marble, from the same.
- 226 Petrified ferruginous clay, from the same.
- 227 Whetstone (refractory), from the same.
- 228 Micaceous quartz, from the same.
- 229 Coppery talc in plates with carbonate of lime.
- 230 Sulphate of lime.
- 231 Porphyries (primitive rocks), from various veins.
- 232 Different eruptive rocks.
- 233 Tertiary deposits; there are three distinct sandstone formations.
- 234 Coal.
- 235 Sandstone.
- 236 White alabaster, from the Potrero de los Angulos, east of Cerro Nevado.
- 237 Pink alabaster.
- 238 Petrifications, schistose formation.
- 239 Talcose quartz.
- 240 Ferruginous clay.
- 241 Yellow slate.
- 242 Mahogany stone, schistose, from Escalles, east of Cerro Nevado.
- 243 Alum.
- 244 Refractory sandstone, from Real Viejo, a valley between the mineral Cerros.
- 245 Carboniferous formations with organic remains.
- 246 Red jasper.
- 247 Red ferruginous clay.
- 248 Yellow ferruginous clay.
- 249 Straw-colored clay.
- 250 Greenish clay.
- 251 Gypsum.
- 252 Whetstone (refractory).
- 253 Carbonate of lime.
- 254 Moss-colored bituminous clay.
- 255 Red ochre.
- 256 Oxide of lead.
- 257 Kaolin, for porcelain-making.
- 258 Mica schists, from the Ampallado district, southwest of Cerro Nevado.
- 259 Limestone, from the Ampallado district, southwest of Cerro Nevado.
- 260 Feldspar, from same district.
- 261 Gypsum, from same district.
- 262 Semi-metal, from same district.
- 263 Argentiferous blende, from same district.
- 264 Auriferous gangue, from same district.
- 265 Clay with ferruginous paste.

## Minerals, Ores, etc.

- 266 Specimens of primitive rocks, from the Colon mining district to the south of the Mejicana.
- 267 Limestone, from the Chilena mine, Cerro Colon, south of the Mejicana.
- 268 Rock or conglomerate with iron oxide.
- 269 Pyritous quartz.
- 270 Crystallized quartz, from the Peregrina mine.
- 271 Matrix, slate in combination with quartz.
- 272 Galenas.
- 273 Argentiferous crystallized quartz.
- 274 Gangues of distinct combinations.
- 275 Mica slate, two varieties.
- 276 Argentiferous pyrites.
- 277 Magnetic iron.
- 278 Granite and mica, from the base of the Cuesta.
- 279 Lapis lazuli, from the Higuera, southwest of the Cerro Nevado.
- 280 Red jasper, same district.
- 281 Carbonate of lime, same district.
- 282 Calc spar, of four distinct classes, from the same.
- 283 Iron pyrites, from the same.
- 284 Green amphibole, from the same.
- 285 Green clays of different varieties, from the same.
- 286 Carbonate of manganese, from the Oro mineral field, southwest of the Cerro Negro.
- 287 Sulphurous quartz, from the same.
- 288 Quartz, three kinds, from the corrales at the confluence of the rivers Agua Amarilla and Agua Blanca.
- 289 Fire-bricks, from the Canteras de Painan, property of Messrs. Valdes & Larrahona.
- 290 Tufa, from Darnian, principal river of Chilecito.
- 291 Limestone, from Chilca, west of Famatina.
- 292 Quicklime, from the same.
- 293 Variety of different rocks, from the mineral hill called Los Bayos.
- 294 Clay of different colors, from Huaco to the east of Chilecito.
- 295 Whetstones, of four distinct kinds, from the same.
- 296 Carboniferous stratum of Corme, to south of Cerro Nevado.
- 297 Steatite, lying on the carboniferous deposit.
- 298 Yellow sandy clay, from the same.

NOTE.—Price of the entire collection of minerals exhibited by Mr. William A. Treloar, \$3000.

## EXHIBITED BY THE PROVINCIAL COMMISSION.

*Other mineral specimens, as follows:*

- 299 Silver ore, from the Cerro Famatina.
- 300 Copper ores and a specimen of regulus, from the same.
- 301 Silver ore, from the Cerro de la Mejicana, same district.
- 302 Copper ore, from the same.
- 303 Soapstone, from the same.
- 304 Ores, etc., from the Porongo mine.
- 305 Porphyries, primitive rocks, from various veins.

## ALMONACID &amp; PARCHAPPE.

*Various samples of minerals from their mines in the Cerro Negro, Famatina.*

- 306 Ferruginous silver ore, ley of silver 8 per cent.
- 307 Semi-bar silver, 70 per cent. of silver.
- 308 Silver ore in quartz with blende, contains native silver and sulphide of silver, ley 3 per cent. of silver.
- 309 Sulphide of silver, contained in quartz.

- 310 Native silver, in quartz.
- 311 Ferruginous silver ore with metallic silver, ley 7 per cent. of fine metal.
- 312 Ferruginous silver ore, free from metallic silver, ley 2 per cent. of fine metal.
- 313 Arsenide of nickel.

## MANUEL I. ILLANES.

*Minerals from the Cerro de Vinchina.*

- 314 Argentiferous ore and pyrites, taken from a new lode.
- 315 Copper ore, from the same.
- 316 Iron ore, from the same.
- 317 Copper ore, from the same.
- 318 Copper pyrites and oxysulphides, from the same.
- 319 Copper, in various combinations, from the same.
- 320 Copper ore, galena, etc., from the same.
- 321 Galena, from the same.
- 322 Nickel ore, from Jaque.
- 323 Nitre.
- 324 Limestone, from Guandacol.
- 325 Slate.

## FRANCISCO BASCUÑAN.

*Various samples of minerals.*

- 326 Second class ore, from the Caldera mineral field, Esperanza mine, property of Messrs. Bascuñan & Acosta.
- 327 Third class ore, from the same.
- 328 Second class ore, Sentazon mine, property of Messrs. Bascuñan & Almonacid.
- 329 Third class ore, from the same.
- 330 Third class ore (ferruginous silver), from the San Pedro mine, same owners.
- 331 Persulphate of iron, for ink-making.
- 332 Sulphate of iron and copper (native), from the Mejicana.
- 333 Native sulphate of alumina, second quality.
- 334 Native sulphate of alumina, third quality, from the Caldera mineral field.
- 335 Marble.
- 336 Hydraulic limestone.
- 337 Gypsum.
- 338 Iron pyrites.
- 339 Galena.
- 340 Jume ashes (a kind of barilla).
- 341 Natural iron-sand.
- 342 White clay.
- 343 Black brick earth.
- 344 Whetstone, fair quality.
- 345 Second class silver ore, from the Blanca Riojana mine, Caldera district, property of Don Francisco Ocampo y Vicencio.
- 346 Bituminous copper ore.
- 347 Silver ore, from the Andacolito mine, Caldera district, belonging to Don Domingo Olivares.
- 348 Silver ore, from the Esperanza mine, Caldera.
- 349 Slate rock, from the same.
- 350 First class silver ore, from the San Vicente mine, Caldera.
- 351 Yellow pyrites ore, from the San Nicolas lode, Esperanza mine, Caldera, property of Messrs. Bascuñan & Acosta.

## MARTIN GELOS.

- 352 Ores from Olta.

## DANIEL DE LA VEGA.

- 353 A petrification.

## THEODORE SCHROEDER.

- 354 Copper ore, from the exhibitor's mine in Famatina.

Minerals, Ores, etc.

SEÑOR GIFFORD.

355 Collection of thirteen silver ores, from the Famatina district.

EDUARDO A. BEVAN.

356 Glass case, containing a collection of ores from the mining districts of the Republic.

PROVINCE OF SAN JUAN.

FRANCISCO D. AGUILAR.

*Collection of minerals, as detailed below. (For sale, price \$1000.)*

- 1-17 Silver and copper ores, from the Castaño mine.
- 18-33 Gold and silver, from the Portezuelo, province of Rioja.
- 34-37 Gold ores, from the Portezuelo, same province.
- 38-46 Silver and copper ores, from Huayaguas.
- 47 Silver ores, from San Lorenzo, province of Mendoza.
- 48-51 Silver ores, from Chanarcillo, Republic of Chili.
- 52-54 Samples of copper, from Cerro Blanco, Chili.
- 55-57 Silver ore, tin and cinnabar, from Huachi.
- 58-61 Silver ore, from Salado.
- 62-64 Silver ore, from Chita.
- 65-80 Silver ore, from Famatina, province of Rioja.
- 81-168 Silver and copper ores, from the Tontal mines.
- 169-269 Silver, copper, iron, and lead ores, limestone, coal, fire-clays, crystals, blende, sulphur, litharge, furnace slags, etc., from the Huerta.
- 270-294 Incrustations, sulphates, carbonate of lime, and mineral waters, from the thermal baths of La Laja.
- 295-303 Crystals, marbles, sulphur, and limestone, from Cerro Zonda.
- 304-308 Marble, plumbago, silica, etc., from Pié de Palo.
- 309, 310 Samples of silver and salt, from Caracoles, Republic of Bolivia.
- 311-355 Ores from the Tontal mines.
- 356-358 Mineral waters, from Huaco.

THE PROVINCIAL GOVERNMENT.

*Another collection of minerals, as follows:*

- 359 Silver ore, from Mercedes mine in Marayes, four samples.
- 360 Seven samples of silver ores, from Marayes.
- 361 Limestone, of contemporaneous formation with the Tontal Mountain.
- 362-3 Samples of clayey sandstone used as whetstone.
- 364 Fire-brick, from the Castaño kiln.
- 365 Fire clays.
- 366 Two samples of the same fire clay.
- 367 Flint, from Tontal.
- 368-370 Fire clay.
- 371-378 Collection of clays of different colors, from Tontal.
- 379 Turf or peaty soil from marshes in the Tontal Mountains.
- 380 Four samples of aluminous rock, from Calingasta.
- 381 Copperas, from Tontal.
- 382 Copperas, from Iglesia.
- 383 Crystallized gypsum.
- 384 Dolomitic rock containing crystals, from Gualilan.

- 385 Dolomitic limestone.
- 386 Metalliferous formation, from Tontal.
- 387 Native copper, unexplored veins of Tontal, black copper oxide.
- 388 Native copper, unexplored veins of the Cordillera de los Patos.
- 389 Silver ore, from the Señor mine in Tontal, now being wrought.
- 390 Silver ore, from the Señorita mine, now being wrought.
- 391 Silver ores, from the Carmen Alto mine, in Tontal.
- 392 Rock from the previous metalliferous formation.
- 393 Silver ores, from the Potosi mine in Tontal, now abandoned.
- 394 Minerals, from the Colon mine, in Tontal. The samples show the ore at different depths, now abandoned.
- 395 Silver ores, from the Asturian mine, in the same locality.
- 396 Silver ores, from the Manto Mercedes mine, now being wrought, same locality.
- 397 Silver ore, from the Encansada mine, Tontal.
- 398 Silver ore, from the Santo Domingo mine, in Castaño.
- 399 Sample of ore, from an unexplored vein in Calingasta.
- 400 Silver and gold ores, with gold visible, from the Rosario mine, in Castaño; abandoned.
- 401 Silver ores, from the San Nicolas mine, in Castaño.
- 402 Ore, from the Dos Amigos mine, in Castaño.
- 403 Silver ore, from the San Ignacio mine, in Castaño.
- 404 Ore, from the Manto Copeton mine, in Castaño.
- 405 Ore, from the Oro mine, in Castaño.
- 406 Silver ore, from the San Nicolas mine, in Castaño.
- 407 Silver ore, from the Ojo de Plomo mine, in Castaño.
- 408 Silver ore, from the Rodado mine, in Castaño.
- 409 Copper ore pyrites, from the Leoncito mine, in Castaño.
- 410 Silver ore, from the Mula mine, in Castaño.
- 411 Silver ore, from the Compañía mine, in Castaño.
- 412 Silver ore, from the Santa Elena mine, in Castaño.
- 413 Samples of ore, from unexplored copper lode at Calingasta.
- 414 Copper, silver, and gold ores, from the Esperanza mine, at Gualilan.
- 415 Gold ores, from the Gualilan mines, at present worked by the Anglo-Argentine Company.
- 416 Native sulphur, from Gualilan; not yet worked.
- 417 Silver and gold ores, from the Desengaño mine, in La Iglesia.
- 418 Copper ore, from a virgin lode in Tontal.
- 419 Litharge, from the Sorocallense works, in Calingasta.
- 420 Rewashed ores, from same mine.
- 421 Quartzose kaolin, decomposing pegmatite, from La Iglesia.
- 422 Refractory kaolin, for manufacturing fire-bricks, from La Iglesia.
- 423 Kaolin, for manufacturing fire-bricks, from La Iglesia.
- 424 Ore, from the Desengaño mine, La Iglesia.
- 425 Ore, from the San Ignacio mine, La Iglesia.
- 426 Gold-bearing pyrites, from the Rayado mineral field.
- 427 Silver ore, from the Iglesia district.

## Minerals, Ores, etc.

- 428 Silver ore, from the Blanca mine, in La Iglesia.
- 429 Silver ore, from the Desengaño mine, in La Iglesia.
- 430 Silver ore, from La Iglesia.
- 431 Silver ore, from the Cortada mine, at Castaño.
- 432 Silver ore, from the Anima, at La Iglesia.
- 433 Silver ore, from the Salado mineral field.
- 434 Silver ore, from Salado.
- 435 Silver ore, from Salado.
- 436 Silver ore, from the old Desengaño mine, Salado.
- 437 Silver ore, from Castaño.
- 438 Silver ore, from Salado.
- 439 Silver ore, with sulphide of silver visible, from Salado.
- 440 Silver ore, from the San Antonio mine, Salado mineral field.
- 441 Silver ore, with chloride of silver visible, from Marayes.

## PROVINCE OF SAN LUIS.

## THE PROVINCIAL COMMISSION.

*A collection of minerals, as follows:*

- 1 Sulphides, oxides, and carbonate of copper, from a lode in the Talita on the heights of the Cienaga; the lode is half a yard wide.
- 2 Ingot of pure copper, smelted in a forge.
- 3 Malachite, with black and red oxide, from the Sierra de Socoscora.
- 4 Auriferous quartz, from the Descubridora vein, property of Messrs. Bertram & Co.
- 5 Manganese ore, from the Vallecito, Sierra de San Francisco. According to Professor Kyle, of Buenos Ayres, it contains fifty-six per cent. available peroxide.
- 6 Crystalline limestone, from the Villa Piedra Blanca.
- 7 Mispickel, arsenide of iron, containing 0.33 per cent. of silver, according to assay made in the University of Córdoba.
- 8 Manganese ore, from San Francisco; the mine is the property of Eloy A. Muñoz.
- 9 Sulphide and carbonate of copper, from the San Salvador vein in the Tatita; it is found in red earth.
- 10 Native copper, taken from the sands of the Socoscora stream.
- 11 Gray copper ore, from Zapallar, property of Francisco Mendez.
- 12 Auriferous quartz, from the Portezuelo, Sierra de Ulape.
- 13 Rock crystal, from the Cañada Honda.
- 14 Gypsum, from Pedernal.
- 15 Asphalt, from the Sierras del Rosario, presented by Francisco Ortiz.
- 16 Auriferous quartz, from Bertram & Co.'s mines.
- 17 Ferruginous gold quartz, with carbonate of copper, presented by José Pintos.
- 18 Pumice stone of which the sands of the Medano of Salto, twenty-four leagues from the capital, are formed.
- 19 Auriferous quartz, from the Descubridora mine, the property of Bertram & Co.
- 20 Steatite, cut with a saw, from Pancanto.
- 21 Sulphide, oxides, and silicates of copper, in nodules, from the redores of the Quebradura del Tigre.
- 22 Iron ore, from Monte Marlita, on the rocky heights of the estancia of Ruiz Moreno.
- 23 Ore from a copper vein at San Francisco.
- 24 Gold quartz, from the Encantadora vein, property of Bertram & Co.
- 25 Gold quartz, from Monte Cristo, property of Bertram & Co.
- 26 Gold quartz, from Gauchito vein, property of Bertram & Co.
- 27 Galena, from the Amada mine, property of Messrs. I. Saá & Co. The ley of silver varies from 0.16 to 0.25 per cent.
- 28 Gold-bearing ore, from the Buena Esperanza mine, property of Messrs. Schmidt, Trendelberg & Co., on the Cerro Rico of the Carolina.
- 29 Ferruginous galena, from Cerro Rico.
- 30 Quartzite.
- 31 Argentiferous lead ore, from the Deseada Sala mine, property of Messrs. I. Saá & Co. This sample contains 0.95 per cent. of silver, and was taken at five yards from surface.
- 32 Stalagmites, from the Monteritos Sololosta.
- 33 Fire clay, from San Francisco, presented by Juan D. Escobar.
- 34 Auriferous conglomerate, with pyrites, from the Carmen de la Buena Esperanza mine, property of Schmidt, Trendelberg & Co., at seventy-five yards' depth. This mine was very rich on the surface.
- 35 Auriferous ochre, from the Sierra del Valle.
- 36 Eruption of a gold-bearing vein, with pyrites and silicate of copper, from the Estancia Grande.
- 37 Ferruginous gold ore, from the Sierra del Valle.
- 38 Auriferous pyrites rock, from the Alto de la Ternera.
- 39 Trachyte, presented by Schmidt, Trendelberg & Co.
- 40 Black peat, from the Cañada Honda.
- 41 Calcined stucco, from Pedernal.
- 42 Hydraulic lime, from the Majada.
- 43 Auriferous ferruginous mineral, the richest in the province, from the Santa Maria vein, property of Frederick Nell, Cañada Honda.
- 44 Hydraulic lime, from the Laguna Brava.
- 45 Galena, from the Cañada Iguana mine, belonging to Daniel and John Funes.
- 46 Aluminous rock, from which alum is manufactured, presented by Francisco Ortiz.
- 47 Ore from an outcrop, contains lead and silver; the mine belongs to Alejandro Olses, Villa de la Quebrada.
- 48 Three samples of auriferous ore siftings, from the ore-washing establishment of Mauricio Morales, Cañada Honda.
- 49 Wrought stone for bruising maize, taken from the floor of a large cave, Intiguasi.
- 50 Auriferous mineral of Intiguasi.
- 51 Iron ore, from Monte Marlito.
- 52 Auriferous quartz, from the Encantadora mine, belonging to Messrs. Bertram & Co.
- 53 Auriferous quartz, from the Josefina mine, belonging to Messrs. Bertram & Co.
- 54 Malachite, from the Angelita mine, property of Mr. Livingstone.
- 55 Ferruginous gold quartz, from the Descubridora mine in San Francisco, property of Messrs. Bertram & Co.
- 56 Ferruginous gold mineral, from the Jurado, Rincon de San Francisco.
- 57 Auriferous lazulite and malachite, from a mine in San Francisco, property of Juan D. Escobar.
- 58 Copper smelted from foregoing ore, property of Juan D. Escobar.
- 59 Auriferous ferruginous quartz, presented by same.
- 60 Auriferous ferruginous quartz, sulphuret, carbonate of copper (malachite and lazulite), from Portezuelo, presented by same.
- 61 Quartz, with copper and gold, from the Portezuelo de los Ogres, presented by same.

Minerals, Ores, etc.

- 62 Ore containing iron, copper, and gold, presented by same.
- 63 Ore from a copper lode, Rio Barroso.
- 64 Rhomboid crystals of calc spar.
- 65 Samples from a copper vein, Caliche-Nogoli.
- 66 Copper, from the Portezuelo, presented by Juan D. Escobar.
- 67 White quartz, presented by Juan D. Escobar.
- 68 Slag, from the ancient smelting establishment of Suveria.
- 69 Black quartz, from the same.
- 70 Fuller's earth.
- 71 Whetstone, presented by Manuel Ergueta.
- 72 Ash of the jume plant—alkali for soap-making.
- 73 Talc.
- 74 Stone containing seeds (according to popular belief).

PROVINCE OF CATAMARCA.

A. METZLER.

- 1 Six samples of copper pyrites, with iron pyrites and blende, from Campo Grande.
- 2 Argentiferous lead ores, from Campo Grande.
- 3 Six samples, from Campo Grande.
- 4 Three samples iron pyrites, from Campo Grande.
- 5 Galena, from Campo Grande.
- 6 Copperas, from Campo Grande.
- 7 Alum, from Campo Grande.

THOMAS HURLEY.

- 8 Various granites, from the Capillitas.
- 9 Light granites, from the Santa Clara.
- 10 Sulphate of copper, from the Salvador mine.
- 11 Galena, from Chanpiyacú.
- 12 Various samples of pyrites, sulpharsenide of copper, blende, galena, etc., from the Restauradora, Rosario, Esperanza, Carmelitas, Santa Clara, Grande Ortiz, and Capillitas mines.
- 13 Ancient stone-miners' hammers, found in the abandoned workings of the Ortiz mine.

SAMUEL LAFONE QUEVEDO.

- 14 Copper regulus.
- 15 Calcined copper regulus.
- 16 Alum.
- 17 Auro-argentiferous copper ore, two masses of arsenical gray copper, or cuargite, which, according to Domeyko, is the typical ore of the Chilian, Peruvian, and Argentine region—from the Restauradora mine.
- 18 Smelting furnace slag.
- 19 Bar of regulus, with deposit of bottoms.
- 20 Bar copper, unrefined.
- 21 Bar copper, refined.
- 22 Bar of regulus, with deposit of bottoms.
- 23 Ore, from the Restauradora mine, Capillitas—sulphate of copper.

FROILAN MURO.

- 24 Iron ore, from a vein near the town of Andalgala.
- 25 Copperas.
- 26 Alum.
- 27 Sulphate of copper.

GABRIEL ROMAY.

- 28 Samples of iron ore, from the mine discovered by the exhibitor in the Alto.

NOTE.—With reference to this mine, the National Congress has passed a law authorizing the Executive to subscribe for shares to

the amount of \$100,000 in a company which may be formed, with a capital of \$1,000,000, for working and smelting the ore discovered by Gabriel Romay.

29 Antimony.

MOLINA & CARRANZA.

- 30 Ore from the Rosario mine, auro-argentiferous copper pyrites.

PROVINCIAL SUB-COMMISSION OF TINOGASTA.

- 31 Iron ore.
- 32 Iron ore, from the Fiambalá district.
- 33 Lead ore, from the same.
- 34 Sulphate of copper, from the Hollada district.
- 35 Volcanic stones, expelled from a crater, Tinogasta.
- 36 Silver ore, containing 2 per cent. silver, Tinogasta.
- 37 Copper ore, containing 50 per cent. copper, also silver, from the Hollada district. The vein is visible on the surface.

CLASICO GALINDEZ.

- 38 Copper ores, from different veins of the Cerro de la Talilla, Tinogasta.
- 39 Silver ore, from the Hollada mine, at 20 metres' depth.
- 40 Silver ore, at 30 metres, from the Rosario mine.
- 41 Silver ore, at 15 metres, from the San Pedro mine.
- 42 Copper ores, from various veins of the Cerro Negro, west of Tinogasta.

ULADISLAO M. SALCEDO.

- 43 Copper and silver ore, containing 0.40 per cent. of silver and 30 per cent. of copper; the vein is 27 inches wide; Descubridora mine.

TRISTAN VILLAFANE.

- 44 Argentiferous galena, from the Cerro del Plomo.

NABOR TULA.

- 45 Copper ore, from the Cerro Negro, various veins not yet being worked at Tinogasta.

THE PROVINCIAL COMMISSION.

- 46 White quartz, very fine grain.
- 47 Garnets.
- 48 Peroxide of manganese.
- 49 Maizillo, from a vein of a mine.
- 50 Espejillo.
- 51 Alum.

PROVINCE OF CORRIENTES.

LUIS RESOAGLI.

- 1 Rock crystal.\*
- 2 Flint and agate.
- 3 Black pebble.

MANUEL MANSILLA.

- 4 Rock crystal, weighing three pounds.\*
- 5 Flint, rock crystal, and agate.

E. G. DE GALARRAGA.

- 6 Rock crystal, weighing four pounds.\*

JUANA G. DE SICARD.

- 7 Stone in the form of a straight horn, found in the Chaco, at a distance of seven leagues from the bank of the river Paraná, at a place where no other stones are met with.\*

\* Samples bearing the mark \* are on sale for account of the exhibitors.

## Minerals, Ores, etc.

## EULOGIO DIAZ.

- 8 Hollow stone, marl.\*

## FELIX PORTA.

- 9 Conglomerate of pebbles upon a stone tube.\*

## FRANCISCO A. DE LOS SANTOS.

- 10 Hollow stone, marl.\*

## MANUEL M. SALAS.

11. Marble.\*  
12. Stone, with crystallizations.\*

## M. T. MANSILLA.

- 13 Copper ore.\*  
14 Mica.

## JOSEFA ACOSTA DE QUIROLO.

- 15 Rock crystal and flint.\*

## AMERICO CUÑA.

- 16 Agate onyx.

## JOSÉ MARIA CABRAL Y MELO.

- 17 Rock crystal and flint.\*

## NICANOR PUJOL.

- 18 Iron ore.

## THE UNIVERSITY OF CORDOBA.

*A collection of minerals, as follows:*

- 1 Argentiferous lead ore, from the Rara Fortuna mine, situated in the Guayco district, Department of Minas. The mineral yields from 0.40 to 0.45 per cent. of silver; the mine has only been worked on a limited scale.
- 2 Copper ore, from a vein, not yet worked, in San Marco, Department of Cruz del Eje; it yielded, on assay, 23 per cent. of copper.
- 3 Bottom of cupelling furnace.
- 4 Iron ore used in smelting the argentiferous lead ores.
- 5 Recently found ore, from a vein at San Antonio, in the Puntilla district. The owner of the mine states the ley of silver to be from 0.15 to 0.18 per cent, and that this ore is very abundant.
- 6 Compact limestone, in rounded concretions, from quarry between Jesus Maria and Totoral.
- 7 Garnet limestone, from Quitilipe, on the Rio Primero.
- 8 Crystallized garnet, from the garnet limestone of the Cerro Lorenzo, estancia of T. M. Allendes, Sierra de Córdoba.
- 9 Granular galena.
- 10 Psilomelane, with gypsum.
- 11 Sienite boulder, transported from the river Primero, near Córdoba.
- 12 Yellow copper pyrites, with covellite and epidote decomposed, from the Sierra de Córdoba.
- 13 Beryls, with columbite, from San Roque.
- 14 Granite boulders, from the river Primero, near Córdoba.
- 15 Pumice stone, porphyritic, with feldspar, amphibolite, and mica, from Mogote de Cacapiche, in the Ojo del Agua.
- 16 Oligoclase, with tourmaline, from the lime quarry, Sierra de Córdoba.
- 17 Magnetic and red oxide of iron, mixed with quartz and mica, accompanied by malachite; Campucho, on the border of the Pampa of Pocho.
- 18 Heterosite upon triplite, Cerro Blanco, road between San Roque and Hoyada, Sierra Alta de Córdoba.

- 19 Chloride and iodide of silver in quartz, Margarita mine, near Agua de Tala, Senezuela.
- 20 Fibrous gypsum, from the Provincial.
- 21 Asbestos incrusting limestone, Cañada de Molina.
- 22 Brown iron ore.
- 23 Amphibolous schist, Malagueño.
- 24 Chlorite schist, soapstone of the Sierra de Córdoba.
- 25 Feldspar, orthoclase, from San Roque.
- 26 Native gold, with brown iron, in quartz.
- 27 Mica slate, Sierra Alta de Córdoba. This is used as a whetstone.
- 28 "Fly wing" boulder, from the river Primero, near Córdoba.
- 29 Red oxide of iron, of granular crystalline structure, from the Candelaria, Department of Cruz del Eje.
- 30 Galena, very fine grained.
- 31 Serpentine in granular limestone, from the lime-kilns of Martin Ferreyra, Malagueño.
- 32 Linarite, with atacamite and quartz, Sierra de Córdoba.
- 33 Copper pyrites, with epidote and limestone, Sierra de Córdoba.
- 34 Epidote.
- 35 Cerusite, formed of decomposition of galena, with remains of same.
- 36 Trachyte, very porous, with limestone boulder, from the Rio Primero.
- 37 Triplite, from the Cerro Blanco, Sierra Alta de Córdoba.
- 38 Sandstone, with gypsum, estancia of M. Arguello.
- 39 Cerusite, with hornblende.
- 40 Native silver, with blende.
- 41 Apatite, from a quartz vein in granite, Sierra Alta de Córdoba.
- 42 Sphene, titanite, with mixture of quartz.
- 43 Horn silver, with minetisite, Santa Cruz, Pedania Argentina.
- 44 Cavernous wachyte, Cerro de Yerba Buena, Senezuela.
- 45 Dark chlorite, from the coal mine in the Granito de la Cruz.
- 46 Gneiss, with spots of feldspar, from the waterfall near the estancia of Señor Allende, Calera.
- 47 Porphyry, with quartz, from the gneiss southwest of the Villa de San Pedro.
- 48 Minetisite, from the Santa Cruz mine, Pedania Argentina, Senezuela.
- 49 Granular limestone, estancia of Señor Allende, Calera.
- 50 Granular limestone, with wollastonite and titanite, lime-kiln of Martin Ferreyra, Malagueño.
- 51 Compact limestone, with quartz, lime-kiln of M. Ferreyra, Malagueño.
- 52 Striped granular limestone, lime-kiln of M. Ferreyra, Malagueño.
- 53 The same, from the same.
- 54 Wollastonite, with granular limestone, lime-kiln of M. Ferreyra, Malagueño.
- 55 Feldspar, with pyroxene and titanite inclosed in granular limestone, lime-kiln of M. Ferreyra, Malagueño.
- 56 Black tourmaline in granite quartz, Argentina mine, near Ojo del Agua, Senezuela.

## JOSÉ M. FRAGUEIRO.

- 57 Argentiferous lead, from the Department of Minas.

## THE PROVINCIAL COMMISSION.

- 58 Whetstones, from Sampochio, Rio Cuarto.  
59 Samples of marble.  
60 Samples of chloritic schist.

Minerals, Ores, Mineral Combustibles, Building Stones, etc.

- 61 Saponaceous, or fuller's, earth.
- 62 Samples of marble, from the works of S. Temple.
- 63 Gypsum.
- 64 Cordobese lime; the quarries are situated at from three to four leagues from the city, very abundant, and in the vicinity of extensive woods for fuel.
- 65 Minerals of different kinds.
- 66 Argentiferous lead.

DAVID ARGUELLO.

- 67 Coal, from the exhibitor's mine on the railway from Córdoba to Tucuman.
- 68 Silver ore.

LUCRECIO VASQUEZ.

- 69 Samples of emeralds, from the San Roque mine.
- 70 Stone in shape of a ball, made by the Indians.

N. MACDOWELL.

- 71 Various minerals.

JOSEPH V. OLMOS.

- 72 Samples of minerals.

PROVINCE OF SALTA.

SANTIAGO PERETTI.

- 1 Wrought stone, carbonate of lime.

THE PROVINCIAL COMMISSION.

- 2 Three stones, sulphate of lime (white).
- 3 Two stones, sulphate of lime (gray).
- 4 Galena ore.
- 5 Iron and argentiferous ore.
- 6 Copper ore.
- 7 Iron argentiferous ore.
- 8 Iron ore.
- 9 Iron ore.
- 10, 11 Silver ore.
- 12 Graphite.
- 13 Silver ore.
- 14 Kaolin, for porcelain-making.

PAUL SARAVIA.

- 15 Sulphate of limestone.

NICOLAS CARENZO.

- 16 Kaolin, for porcelain-making.
- 17 White clay.
- 18 Fuller's earth.

SIDNEY TOMAYO.

- 19 White clay.

HILARION ARIAS.

- 20 Sulphuret of lime—espejillo.

EUGENIO CABALLERO.

- 21 Common graphite.

BENJAMIN ZORRILLA.

- 22 Silver ore.

SEGUNDO BEDOYA.

- 23 Silver ore.

MELCHORA CORNEJO.

- 24 Carbonate of lime.

PROVINCE OF BUENOS AYRES.

LOUIS ELORDI.

- 1 Six samples of copper ores, from Patagones. (To be returned.)

PROVINCE OF SANTA FE.

CECILIO ECHEVARRIA.

- 1 Collection of sixteen ores, from the Misiones of Corrientes; and four specimens of quartz and agates, from Alto Uruguay. (To be sold. Price, \$50.)

PROVINCE OF TUCUMAN.

EUJENIO RAP.

- 1 Collection of minerals, not classified.

PROVINCE OF JUJUI.

THE PROVINCIAL GOVERNMENT.

- 1 Five samples of silver ore, from Ticara.

PROVINCE OF ENTRE RIOS.

SUB-COMMISSION FOR THE DEPARTMENT OF DIAMANTE.

- 1 Collection of stones from the shores of the rivers Plata and Uruguay.

CLASS 101.

Mineral combustibles—Coal—anthracite, semi-bituminous, and bituminous, etc.

PROVINCE OF RIOJA.

FREDERICK GALVAN.

- 1 Sample of coal, from Tumbillos, Famatina. The vein of coal is visible on the surface for half a league approximately, and is about two yards in breadth.

PROVINCE OF CATAMARCA.

GABRIEL ROMAN.

- 1 Sample of coal, from the Department of Alto.

THE PROVINCIAL COMMISSION.

- 2 Coal.
- 3 Coal.

CLASS 102.

Building stones, marbles, slates, etc.

PROVINCE OF BUENOS AYRES.

EMILIANO Y CIPRIANO VALDES.

- 1 Stone from Tandil (Piedra de la Tinta). This stone is ductile, and can be wrought easily, but hardens on exposure to the air.
- 2 Stones from Sierras de la Laguna de los Padres, district of Balcarce.
- 3 Stone with herbs growing on it, from same place.

PROVINCE OF CORDOBA.

JOSEPH V. OLMOS.

- 1 Four samples of white marble.

DR. NICOLAS AVELLANEDA.

- 2 Four different specimens of marble.

PROVINCE OF SAN JUAN.

THE PROVINCIAL COMMISSION.

- 1 Two samples of wrought stone.

## Lime, Cement, Artificial Stone, etc.

**PROVINCE OF SANTIAGO DEL ESTERO.****THE PROVINCIAL COMMISSION.**

- 1 Two wrought stones, from the Sierra de Guayacan.

**PROVINCE OF SAN LUIS.****THE PROVINCIAL COMMISSION.**

- 1 A stone pestle, used by the Indians for stamping maize, etc.
- 2 Ash pan of soapstone, made by the Indians.
- 3 Ash pan for burning incense, made by the Indians.
- 4 Ash tray, made by the Indians.

**PROVINCE OF SALTA.****PROVINCIAL COMMISSION.**

- 1 A wrought stone for the top of a table.

**PROVINCE OF CATAMARCA.****REV. RUFINO SEGURA.**

- 1 Paving stone, from the Department of Capital.
- 2 Soapstone.

**THE PROVINCIAL COMMISSION.**

- 3 Sample of soapstone, from the Department of Ancasti.

**SUB-COMMISSION OF ANDALGALA.**

- 4 Soapstone, from the Department of Belen.

**ISIDORO RISO.**

- 5 Samples of soapstone.

**NICOLAS HERRERA.**

- 6 Specimens of slate.

**CLASS 103.****Lime, cement, artificial stone, etc.****PROVINCE OF ENTRE RIOS.****SUB-COMMISSION OF DIAMANTE.**

- 1-4 Hydraulic stones for foundations.
- 5 Hydraulic cement.
- 6 Hydraulic stone.
- 7, 8 Clay limestone.
- 9-11 Conglomerate shell and sandstone.
- 12-16 Clay limestone.
- 17-19 Conglomerate shell and claystone.
- 20 Shell stone for foundations.
- 21 Hydraulic lime, 1st class.
- 22 Hydraulic lime, 2d class.
- 23 Artificial stone.
- 24 Petrified wood.

**RAMON SOLÁ.**

- 25 Gypsum, found three miles north of the city of Paraná.

**THE COMMISSION OF PARANA.**

- 26 Tosca stone.
- 27 Paving stones, from Cerro Grande.
- 28 Paving stones, another quality.
- 29 Paving stones for streets.
- 30 Limestone.
- 31 Samples of petrified oyster-shells; there are large quantities in the hills of this department.
- 32 Common lime.
- 33, 34 Lime.
- 35 Lime, from Paraná.
- 36 Limestone, from Cerro No. 1.

- 37 Native Roman cement.

- 38 Sulphate of lime, from Gualeguaychú.

**R. FORNASARI & H. FACINO.**

- 39 Artificial stone.

**N. GARLIVE.**

- 40 Artificial stone.

**PROVINCE OF BUENOS AYRES.****JOHN PEDRUNCINI.**

- 1 Conchilla lime, from Mar Chiquita.

**NICASIO VALDES.**

- 2 Tosca lime, from Balcarce.
- 3 Lime tosca, from Balcarce; found in large quantities in "viscachera" holes on the exhibitor's camp, and is used for making tosca lime.
- 4 Conchilla lime, from Balcarce.

**MANUEL A. IÑIGUEZ.**

- 5 Limestone, from Tandil.

**JUSTICE OF PEACE OF ENSENADA.**

- 6, 7 Conchilla lime, from Ensenada.
- 8 Conchilla lime, from Zarate.

**THE COMMISSION OF WATER-WORKS.**

- 9 Conchilla lime.
- 10 Limestone.
- 11 Pulverized clinker.
- 12 Raw cement.
- 13 Burnt cement.
- 14 Raw cement, formed brick-shape.

**MIGUEL WELSCH.**

- 15 Limestone.
- 16 Lime, made from the above limestone.
- 17 Lime, made from same.

**VICENTE CAETANI.**

- 18 Artificial marble.

**JOSEPH SANDROT.**

- 19 Six samples of artificial stone.

**JUSTICE OF PEACE OF PATAGONES.**

- 20 Gypsum, sulphate of lime.
- 21 Gypsum, from San Vicente.
- 22 Gypsum stones, from Patagones.

**MANUEL GACHE.**

- 23 Gypsum, from Rio Salado.

**PROVINCE OF CATAMARCA.****THE PROVINCIAL COMMISSION.**

- 1 Water-lime.
- 2 Gypsum, sulphate of lime, from Capallan.
- 3 Gypsum, crystallized, from Ancasti.

**ISIDORO RISO.**

- 4 Water-lime.
- 5 Stalagmite lime.

**THE PROVINCIAL COMMISSION.**

- 6 Limestone.
- 7 Gypsum, sulphate of lime.

**PROVINCE OF RIOJA.****MARTIN GELOS.**

- 1 Calcined Canutillo lime.
- 2 Calcined Canutillo lime, from Olta.
- 3 Gypsum, sulphate of lime, from Santa Barbara.
- 4 Gypsum, from Aguada, abundant.

Clays, Kaolin, Silex, etc.

THE PROVINCIAL COMMISSION.

- 5 Calillo de Cortadera.
- 6 Raw lime, from Los Llanos.
- 7 Common sulphate of lime.

PROVINCE OF TUCUMAN.

THE PROVINCIAL COMMISSION.

- 1 Black limestone.
- 2 Yellow limestone.
- 3 White limestone.
- 4-6 Common sulphate of lime.

PROVINCE OF CORRIENTES.

THE PROVINCIAL COMMISSION.

- 1 Box containing limestone, from the Department of Itati.

PROVINCE OF SAN JUAN.

FRANCISCO D. AGUILAR.

- 1 Hydraulic lime.

PROVINCE OF SANTIAGO.

THE PROVINCIAL COMMISSION.

- 1, 2 Lime from Guasayan.

CLASS 104.

Clays, kaolin, silex, and other materials for the manufacture of porcelain, glass, fire-bricks, etc., refractory stones for furnaces, pigments, etc.

PROVINCE OF CORRIENTES.

FELICIANO LOPEZ.

- 1, 2, 3 Clays, used for the manufacture of porcelain, bricks, and tiles.
- 4 Yellow stone, found in large quantities on the shores of the river Paraná, and used as a pigment for painting porcelain.
- 5 Paint from pulverized yellow stone.
- 6 Pulverized yellow stone.

SUB-COMMISSION OF BELLA VISTA.

- 7 Stone, in the centre of which a substance is found which, when dissolved in water, makes paints of different dyes, but generally bright red and yellow.
- 8 Several classes of clays.

PROVINCE OF ENTRE RIOS.

COMMISSION FOR THE DEPARTMENT OF PARANA.

- 1 Chalky clay.
- 2 White clay.
- 3, 4 Vegetable earth.
- 5 Vegetable earth, second class.
- 6 Pure clay.
- 7 Sandy clay.
- 8 Sand—Avenaria.
- 9 Earth, from Campo de Merner.
- 10 Sand, from the Ceibo rivulet, Victoria.
- 11 Earthy kind of lime.
- 12 Artificial volcanic earth, Puzzolana, Victoria.
- 13 Tripoli, natural composition.
- 14 Conglomerate of red earth and white sand, from Victoria.
- 15 Calcined lime earth, with gold and silver particles.

- 16 Raw lime earth, with gold and silver particles.

- 17 Tripoli, natural composition, from the Crespo rivulet, in Victoria.

PETER CALDERON.

- 18 Earth, from the swamps west of the city of Paraná.

- 19 Vegetable earth, from the quinta known as Lupercio, half a league from Paraná.

V. M. FONTES & S. NEYRA.

- 20 Earth, from Donna Felipa Gomez's camp; it is used for whitewashing after having been dried and sifted.

CORONEL SIMON DE SANTA CRUZ.

- 21 Sand, from Ibicui.

PROVINCE OF RIOJA.

ABEL BAZAN.

- 1 Refractory bricks.

THE PROVINCIAL COMMISSION.

- 2 White marl.
- 3 White marl, from Totorilla.
- 4 White marl, from Olta.
- 5 White marl, from Barrera (considered of superior quality).
- 6 Pink earth.
- 7 White earth.
- 8 White earth, from Portezuelo.
- 9 Red earth, from Portezuelo, used for making earthenware, and as a pigment.
- 10 Red marl.

MARTIN GELOS.

- 11 Marl.

JOSEPH BARROS.

- 12 Refractory bricks.

PROVINCE OF SANTIAGO.

- 1 White earth, from Cuartenda.
- 2 Red earth, from Rio Hondo.
- 3 Saltpetre, from the Tierra Salitrosa.
- 4 Black earth, from Rio Hondo.
- 5 Brown earth, from Rio Hondo.
- 6 Saltpetre earth.

PROVINCE OF BUENOS AYRES.

EMILIANO Y CIPRIANO VALDES.

- 1 Black vegetable earth, from Balcarce, Quebrada de Hacha.
- 2 White vegetable earth, used for whitewashing, Nicasio Valdes.
- 3 Red clay, found under stones on the hills of Laguna de los Padres, Balcarce.

JUSTICE OF PEACE OF ZARATE.

- 4 Black earth.
- 5 Clay, from the lowlands of Zarate.
- 6, 7 Clay, from the coast of Ensenada.
- 8 Ferruginous clay.

THE COMMISSION OF WATER-WORKS.

- 9, 10 Clays.

PROVINCE OF CATAMARCA.

TRISTAN LOBO.

- 1 Clay earth, for making bricks and tiles, etc.
- 2 Bricks and tiles, made at the establishment of the exhibitor, in Valle Viejo.

## Lithographic Stones, Whetstones, Precious Metals, Copper, etc.

## SAMUEL A. LAFONE QUEVEDO.

- 3 White tofo clay, used for making fire-bricks.
- 4 Ground quartz, quijo, used for making fire-bricks.
- 5 Fire-bricks, made at the Pilcias smelting works, with the quijo and tofo clay above mentioned. Mardoques Molina is the inventor of this process.

## THE PROVINCIAL COMMISSION.

- 6 Five distinct classes of colored earths.
- 7 Saponaceous stone in powder.
- 8 Kaolin, for porcelain-making.
- 9 Red earth.
- 10 Colored earths (pigments).
- 11 Lime earth, from Fiambala.
- 12 Gray clay, from Belen.
- 13 Gray clay, bright yellow clay.
- 14 Earth for painting and dyeing.
- 15 Cohoipa, from the Hollada district, for cleaning all kinds of cloths.
- 16 Jasi (white color).
- 17 White earth.
- 18 Yellow earth.
- 19 Colpa—carbonate of soda.
- 20 Yellow clay.
- 21 Yellow earth.
- 22 Slate-colored earth.
- 23 Slate-colored clay.
- 24 Jasi (rose-colored).
- 25 Earth for pottery-ware.
- 26 Red earth.
- 27 Native carbonate of soda.
- 28 Jasi (yellow-colored).
- 29 White clay.
- 30 Tierra de raices—earth of roots.
- 31 Borax.

## PROVINCE OF TUCUMAN.

## THE PROVINCIAL COMMISSION.

- 1 White earth.

## CLASS 106.

## Lithographic stones, whetstones, etc.

## PROVINCE OF BUENOS AYRES.

## EMILIANO Y CIPRIANO VALDES.

- 1 Fine sand, from the Balcarce coast.
- 2 Coarse sand, from the Balcarce coast.
- 3 Vegetable earth, from the Balcarce coast.

## PROVINCE OF RIOJA.

## MARTIN GELOS.

- 1 Whetstones, from La Torre, in natural state, very abundant on the Olta hills.
- 2 Various flint-stones, from the same.

## PROVINCE OF CATAMARCA.

## LUIS R. MEDINA.

- 1 Whetstone, from Concepcion.

## CLASS 107.

## Mineral waters, natural brines, etc.

## PROVINCE OF CATAMARCA.

## THE PROVINCIAL COMMISSION.

- 1 Mineral waters from the Aguas Termales del distrito de Fiambala.
- 2 Samples of sediment of same.
- 3 Water from the hot baths of Fiambala.

- 4 Black alum water, with sample of sediment.
- 5, 6 Water from the hot baths of Belen, with sediment.

## PROVINCE OF RIOJA.

## LUIS A. PEREZ.

- 1 Water from the hot baths of said province.

## PROVINCE OF SANTIAGO.

## THE PROVINCIAL COMMISSION.

- 1 Two bottles of zarza water.
- 2 Twelve bottles from the hot springs of Rio Hondo.
- 3 Two bottles of mineral water, from Verano.

## PROVINCE OF SALTA.

## MELCHORA T. DE CORNEJO.

- 1-3 Several sorts of mineral waters.

## PATRON BROTHERS.

- 4 Several sorts of mineral waters.

## PROVINCE OF SAN LUIS.

## ANTONIO SCHMIDT.

- 1 Four bottles of mineral water.

## JOHN D. ESCOBAR.

- 2 Two bottles of mineral water, from Piedra Blanca.

## PROVINCE OF SANTA FE.

## SUB-COMMISSION OF THE COLONY OF ST. CARLOS.

- 1, 2 Vegetable earth, from said colony.

## PROVINCE OF BUENOS AYRES.

## CHARLES OTAMENDI.

- 1, 2 Shells from the Balcarce coast.

## CLASS 110.

## Precious metals.

## PROVINCE OF SAN LUIS.

## FREDERICK NELL.

- 1 Gold, from the exhibitor's mine, washed in poruña.
- 2 Gold, from the exhibitor's mine in Cañada Honda.

## BERTRAM &amp; CO.

- 3 Gold from the Descubridora mine.

## THE PROVINCIAL COMMISSION.

- 4 Gold from Carolina, without amalgamation.

## PROVINCE OF BUENOS AYRES.

## MARTIN DE GAINZA.

- 1 Gold from Patagones.

## CLASS 112.

## Copper in ingots, bars, etc.

## PROVINCE OF CATAMARCA.

## SAMUEL A. LAFONE QUEVEDO.

- 1 Four ingots of copper, deposit of bottoms.

Chemicals, Pharmaceutical Preparations, etc.

## DEPARTMENT II.

### MANUFACTURES.

#### CLASS 200.

Chemicals, pharmaceutical preparations, etc., potash, soda, salt.

#### PROVINCE OF CORRIENTES.

CHARLES SERRAVALLE.

- 1 Six bottles elixir de pepsina.
- 2 Three bottles syrup of quinine and iron with peel of bitter oranges.
- 3 Four bottles wine—tónico digestivo de pepsina.
- 4 Five bottles citrate of magnesia, containing fifty grains of said salt, each bottle.
- 5 One bottle citric acid from lemons of Corrientes.
- 6 One roll plaster, arnica montana.
- 7 Box containing powdered blood.
- 8 Two bottles agua balsamica tónico, for the dressing-room.
- 9 Box containing cure for toothache.
- 10 Book of arnica montana plaster.

JOAQUIN QUEIREL.

- 11 Five bottles solucion depurativo.

CARLOS TAVA. (To be returned.)

- 12 Three bottles bitters.
- 13 Three bottles vino digestivo de pepsina.
- 14 Three bottles pectoral syrup.
- 15 Two bottles Cepacaballo syrup.

SUB-COMMISSIONER OF BELLA VISTA.

- 16 Salt extracted from the earth from the bank of Santa Lucia River.
- 17 Sample of said earth.

#### PROVINCE OF RIOJA.

A. G. PEREZ.

- 1 Inca yuyo, tonic. The leaves can be used in infusion, or two spoonfuls of the tincture in half a tumbler of water.

MARTIN GELOS.

- 2 Mineral salt.

THE PROVINCIAL COMMISSION.

- 3 Salt.
- 4 Alum from the plains.

#### PROVINCE OF SANTIAGO.

THE PROVINCIAL COMMISSION.

- 1 Jume ash, for soap-making.

#### PROVINCE OF SALTA.

THE PROVINCIAL COMMISSION.

- 1 Block salt.

#### PROVINCE OF BUENOS AYRES.

JUSTICE OF PEACE OF BAHIA BLANCA.

- 1, 2 Two classes of salt from the salt lakes of said locality.

JUSTICE OF PEACE OF PATAGONES.

- 3 Espuma salt.
- 4, 5 Rock salt.

N. MURGA.

- 6 Common salt.

ELEUTERIO S. MUJICA.

- 7 Artificial guano from dried and boiled blood.

Respecting this artificial guano, Professor Kyle, of Buenos Ayres, says, "According to request, I have analyzed the sample sent to this laboratory; it is as follows:

Water,	11.90
Organic matter,	79.60
Salts derived from the blood,	4.05
Earthy matter,	4.45

100.00

Azote contained in the organic matters, 12.06  
Equal to ammonia, 14.65

- 8 Preserved blood.

BELTRAN FABLET.

- 9 Preserved blood.
- 10 Soluble blood.

#### PROVINCE OF TUCUMAN.

THE PROVINCIAL COMMISSION.

- 1 Common salt.

#### PROVINCE OF CATAMARCA.

THE COMMISSION OF ANDALGALA.

- 1 Block salt, from Laguna Blanca.

THE PROVINCIAL COMMISSION.

- 2 Rock salt, from the district of Fiambala.

SAMUEL A. LAFONE QUEVEDO.

- 3 Cachi-yuyo ash; it produces the carbonate of soda, and is used for soap-making.
- 4 Carbonate of soda, made from the jume plant; is used for soap-making.

THE PROVINCIAL COMMISSION.

- 5 Saltpetre.
- 6 Saltpetre, from Barranca.

#### PROVINCE OF JUJUI.

THE PROVINCIAL COMMISSION.

- 1 Block salt.

## Oils, Soaps, Candles, Paints, Dyes, Medical Compounds, etc.

**PROVINCE OF SAN LUIS.**

JOHN D. ESCOBAR.

- 1 Salt, from the salt lakes.

**PROVINCE OF SAN JUAN.**

DELFIN TERRAMOLA.

- 1 Salt, from the salt lakes of Leoncito.

FABIAN JONES.

- 2 Jume ash, for soap-making.

M. A. VIDAL.

- 3 Jume ash, for soap-making.

STEPHEN BRUNA.

- 4 Jume ash, for soap-making.

**CLASS 201.**

Oils, soaps, candles, etc.

**PROVINCE OF BUENOS AYRES.**

PETER ESCRICH.

- 1 Pea-nut oil.

INOCENCIO CARDALDA.

- 2 Glycerin.

AURELIO PINEIRO.

- 3 Palma-Christi soap.

**PROVINCE OF ENTRE RIOS.**

MIGUEL LANIERI.

- 1 Samples of soap, Mairé system.
- 2 Samples of soap made with colt's grease.
- 3 Samples of soap made from dead animals.
- 4 White soap.
- 5 Yellow soap.

JOSEPH IGLESIAS.

- 6 Soap, imitation of Spanish.

**PROVINCE OF CATAMARCA.**

SAMUEL A. LAFONE QUEVEDO.

- 1 Soap made with carbonate of soda extracted from the jume plant and the ash of cachi-yuyo. The green color is from the leaves of the hediondilla plant, used in the refining.

THE PROVINCIAL COMMISSION.

- 2 Wild-boar soap.

**PROVINCE OF SALTA.**

THE PROVINCIAL COMMISSION.

- 1 Samples of soap.

**PROVINCE OF CORDOBA.**

THE PROVINCIAL COMMISSION.

- 1 Oil, Bálsamo de Quebracho flojo.

**PROVINCE OF RIOJA.**

CARMEN T. DAVILA.

- 1 Two bottles of home-made olive oil.

**PROVINCE OF SAN LUIS.**

ANTONIO ALRIC.

- 1 Soap, manufactured by the exhibitor.

**PROVINCE OF JUJUI.**

SALVADOR BILLAR.

- 1 Two jars petroleum tar.

**PROVINCE OF TUCUMAN.**

THE PROVINCIAL COMMISSION.

- 1 Soap.

**PROVINCE OF SANTA FE.**

DR. BERGARÉ.

- 1 Three bottles pea-nut oil.

**CLASS 202.**

Paints, pigments, dyes, etc.

**PROVINCE OF BUENOS AYRES.**

JULIEN &amp; SON.

- 1 A collection of 216 samples of wools and stuffs, dyed of various colors.

ADRIAN PRAT.

- 2 Case containing 312 samples of wools dyed different colors, and 312 skeins of wool of various shades. (To be returned)

EMILIO DOUCET.

- 3 Twelve bottles of ink, for writing, different colors.

ELEUTERIO S. MUJICA.

- 4 Albumina de sangre, for giving consistency to colors.

BELTRAN FABLET.

- 5 Albuminas.

ANTONIO MURO.

- 6 Fourteen bottles of different-colored inks.

**PROVINCE OF CATAMARCA.**

MELCHORA HERRERA.

- 1-3 Cochineal, of three kinds,—Penca, Quimil, and Sinto.

**PROVINCE OF SAN LUIS.**

LORENZO PUERTAS.

- 1 Medical compound made by the exhibitor with medicinal herbs, for curing cholera.

**CLASS 203.**

Medical compounds, flavoring extracts, essences, etc.

**PROVINCE OF BUENOS AYRES.**

ERNEST NOLTE.

- 1 Tooth powder Bella Santafecina; obtained a prize in the Córdoba National Exhibition.

MAURO CABRERA.

- 2 Six bottles specific for curing horses.

INOCENCIO CARDALDA.

- 3 Iodoform.
- 4 Pepsine.
- 5 Pepsine, powdered.

JOSEPH M. LAGOS.

- 6 Maxmelina sheep wash.

ANA BARTON DE TORRES.

- 7 Lozenges for fumigation.

Bricks, Tiles, Fire-clay Goods, Glassware, Furniture, etc.

**PROVINCE OF SANTA FE.**

**JULIAN ROSQUELLAS.**

- 1-3 Bálsamo privilegiado de Rosquellas, remedy for curing animals, particularly horses.
- 4 Toma, remedy for curing animals, particularly for cattle.
- 5 Aplicacion, remedy for curing animals, especially horses.

**PROVINCE OF SALTA.**

**MELCHORA T. DE CORNEJA.**

- 1 Five bottles of zarza water.

**CLASS 206.**

Bricks, tiles, etc.

**PROVINCE OF BUENOS AYRES.**

**JOHN PEDRUCINI.**

- 1 Burnt brick, from Mar Chiquita.

**EMILIANO Y CIPRIANO VALDES.**

- 2 Burnt brick, from Balcarce.
- 3 Raw brick, made from the black earth of said district.

## GOVERNMENT OF THE ARGENTINE REPUBLIC.

- 179 The Argentine Republic (1 vol.), its Natural Resources, etc., etc., published by the Argentine Centennial Central Committee in Buenos Ayres.

## KARL FRIEDR. OTTO MULLER, BUENOS AYRES.

- 180 Guide for the Young Pianist.
- The object of this work is to make a level, easy way to the art of piano playing, even for very young children (from five to seven years), to cultivate all those faculties of mind and soul upon which success rests, and to make the way cheerful and animating, stirring thus the pupil's desire for advancement.
- Div. I. gives the foundation principles in music, teaching *time* and *rhythm* as the first condition.
- Div. II. Action of playing, based upon the principles of mechanics and anatomy of the hand and fingers.
- Div. III. System of notation, writing and reading of music. A *completely new* and (*for the first time*) rational way to cultivate the eyesight and to enable the pupil to play at first sight (*prima vista*). Practical course.
- Div. IV. Modes of playing, legato, staccato.
- Div. V. Construction of music. Tonic, dominant. Phrase, major, minor, qualification of the intervals. Transposition. Appendix. Melismata.

- 39 Sauce colorado—Red Willow.
- 40 Quebracho.
- 41 Algarrobo.
- 42 Viraró.

**Rough-Hewn Specimens.****PROVINCE OF SAN JUAN.**

FRANCIS D. AGUILAR.

- 1 Seven specimens of algarrobo wood, in form of flowers (natural formation).
- 2 One specimen of chica wood, in form of flowers.
- 3 Palo borracho.
- 4 Chica.

**TERRITORY OF THE CHACO.**

THE RIVER BERMEJO NAVIGATION COMPANY.

- 1 One sample of palo santo.

THE COMMISSION.

- 1 Inga.
- 2 Colito.
- 3 Taguá-timbó.
- 4 Taperiguá.
- 5 Ñandupa. This tree produces a fruit similar in form to that of a pear; weight, 8 oz.
- 6 Tata-yuba. Highly valued for furniture.
- 7 Mataojo.
- 8 Incienso. For building purposes; produces resin.
- 9 Peteribí. For building purposes and furniture work.
- 10 Ñuati-curuzú. For building purposes and furniture work.
- 11 Casita.
- 12 Laurel—Nectandra porphyria Gr. For building and making furniture.
- 13 Ivirarú. For building purposes.
- 14 Espinillo, genus Acacia.
- 15 Uati-arroyo. Parasitic creeper.
- 16 Curupai de llano.
- 17 Vira pûta. Used for naval constructions.
- 18 Ai raran.
- 19 Ará-ticú.
- 20 Guayabo. For furniture.
- 21 Guayacan.
- 22 Palo blanco.
- 23 Cambá-acá. Produces a pungent fruit like pepper.
- 24 Quebracho. Very good for building purposes; it petrifies on being buried or placed under water.
- 25 Cedro—Cedar—Cedrela Brasiliensis. For cabinet-work.
- 26 Palo de leche—Sapium aucuparium. It produces a substance like gutta-percha or india-rubber.
- 27 Guay suú.

Collections of Woods.

- 28 Ivá-pomú. Produces a fruit like a plum.
- 29 Sipoi jacaré. Parasitic creeper.
- 30 Chilca Guaycurú.
- 31 Aguay.
- 32 Niguatí-curnzú.
- 33 Guaymí-piré. Parasite.
- 34 Espina corona. Very handsome grain, and much appreciated for cabinet-work.
- 35 Ñiangá-piré.
- 36 Ivira embé. For naval constructions.
- 37 Manduvira. For building purposes.
- 38 Guayavi-sayú. For making carriages.
- 39 Vicozú rembú.
- 40 Vira piú.
- 41 Caá boré.
- 42 Vira pepé.
- 43 Curupaina. For building purposes.
- 44 Lapacho, family Bignoniaceæ, genus Tecoma. This is a very fine wood; for dyeing rose color it is efficacious.
- 45 Vira itá.
- 46 Sapo-ú.
- 47 Ivira pé.
- 48 Curupai. Used for making carriages, and for tanning.
- 49 Urundai pará. For building purposes.
- 50 Guayavi blanco. For making carriages.
- 51 Carandá ú.
- 52 Naranjo—Orange—Citrus aurantium.
- 53 M'bocoya—Cocoanut.
- 54 Palo de rosa—Rose-wood. For cabinet work.
- 55 Camoti.
- 56 Abati-timbai.
- 57 Molle resinoso. Used for making furniture, and produces a fragrant resin.
- 58 Viraró. For naval constructions.
- 59 Urunday. For building purposes.
- 60 Guapoi.
- 61 Somú-ú.
- 62 Yatinangú. Produces an acid fruit.
- 63 Catiguá.
- 64 Ñandupá-ité. Produces a fruit similar to that of the ñandupá, but of larger size.
- 65 Ambaú. The roots and leaves of this tree possess medicinal qualities.
- 66 Pipi guazú. This tree has a very disagreeable smell, but is supposed to be medicinal.
- 67 Viragui í.
- 68 Zapihangui.
- 69 Coqú.
- 70 Barba-timon. Produces a very good dye.
- 71 Jacará-razú.
- 72 Tayú-pirurú.
- 73 Jacurubuzú.
- 74 Iguapomú-sayú.
- 75 Palo de lanza.
- 76 Quebracho blanco—Prosopis spec. Used for making carriages.
- 77 Juqueri.
- 78 Ivaporcita.
- 79 Timbó. Similar to cedar-wood, though not quite so fine a wood.
- 80 Virandé-i.
- 81 Palma negra—Black Palm.
- 82 Uva-poó. Produces fruit.
- 83 Curupicay.
- 84 Curá-turá.
- 85 Caú.
- 86 Comandá guazú. Used for making carriages, and is very highly valued.
- 87 Canelon.

NOTE.—The price of the woods mentioned in this list is about fifty cents per square yard.

PROVINCE OF SANTA FE.
